Course Content and Aims

3 day residential course for CT, Barium and GI Radiographers requiring training in CT colonography techniques.

To learn a reproducible method for performing CT colonography that can be taken back to base hospitals.

Theoretical sessions underpinning comprehensive practical training in all aspects of the CT colonography examination.

To understand the clinical and financial principles required to set up a CTC service.

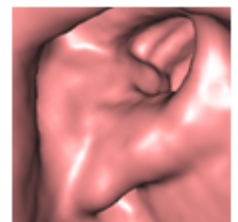

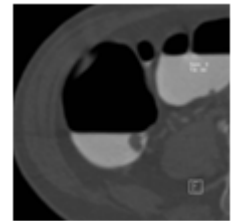

To understand the multidisciplinary and multimodality approach to the investigation and management of colorectal disease.

Training visits to departments in Leeds and Mid Yorkshire performing over 2,000 examinations per year

Based on the success of the renowned St James's University Hospital Barium Enema Course
